Developing sustainable food value chains - Guiding principles

The agricultural value chain concept has been used since the beginning of the millennium, primarily by those working in agricultural development in developing countries. Although there is no universally accepted definition of the term, it normally refers to the whole range of goods and services necessary for an agricultural product to move from the farm to the final customer or consumer.

Agricultural value chain - Wikipedia

Collectively, a synthesis of related literatures indicates that a minimum of three underlying dimensions – inclusivity, scope and disclosure – collectively characterize a system or set of interdependent and sequential processes that evaluate and verify the environmental and social performance of an extended supply chain.

Sustainable evaluation and verification in supply chains

Mission. Supply-Chain Management (SCM), techniques with the aim of coordinating all parts of SC from supplying raw materials to delivering and/or resumption of products, tries to minimize total costs with respect to existing conflicts among the chain partners. An example of these conflicts is the interrelation between the sale department desiring to have higher inventory levels to fulfill ...

Climate-smart agriculture (CSA) goes beyond new technologies and practices like drought resistant varieties or precision farming. To achieve the multiple objectives of productivity and food security, enhanced farmer resilience and reduced greenhouse gas emissions, CSA must adopt various systems perspectives. These include landscapes and ecosystems, as well as value chains.
