Before digital photography the only way to work in black and white was to use black and white film. Thankfully, now it's much easier to work in black and white, just by switching your camera to Monochrome Mode (check your camera's manual if you are unsure how to do so, look for Picture Styles settings).

### **A Beginner's Guide to Doing Black and White Photography**

Black and white results are more specific to your post-processing skills than what camera you use. (BTW, my own experience is that this is also more true when using film.) You need to learn how to take a digital file and get the kind of black and white you want with the tools that work best for you.
