Java is a general-purpose computer-programming language that is concurrent, class-based, object-oriented, and specifically designed to have as few implementation dependencies as possible. It is intended to let application developers "write once, run anywhere" (WORA), meaning that compiled Java code can run on all platforms that support Java without the need for recompilation.

I'm trying to export a program in Eclipse to a jar file. In my project I have added some pictures and PDF:s. When I'm exporting to jar file, it seems that only the main has been compiled and exported.. My will is to export everything to a jar file if it's possible, because then I want to convert it to an extraditable file, like .exe-file.
