In particle physics, an elementary particle or fundamental particle is a subatomic particle with no substructure, thus not composed of other particles. Particles currently thought to be elementary include the fundamental fermions (quarks, leptons, antiquarks, and antileptons), which generally are "matter particles" and "antimatter particles", as well as the fundamental bosons (gauge bosons and ...

Introduction. A probability space is a mathematical triplet (Ω, \mathcal{F}, P) that presents a model for a particular class of real-world situations. As with other models, its author ultimately defines which elements $\omega \in \Omega$ will contain.. The sample space is the set of all possible outcomes. An outcome is the result of a single execution of the model. Outcomes may be states of nature, possibilities ...
