The approach we have developed is based on NURBS (Non-Uniform Rational B-Splines), a standard technology employed in CAD systems. We propose to match the exact CAD geometry by NURBS surfaces, then construct a coarse mesh of "NURBS elements".

Euclidean geometry is a mathematical system attributed to Alexandrian Greek mathematician Euclid, which he described in his textbook on geometry: the Elements. Euclid's method consists in assuming a small set of intuitively appealing axioms, and deducing many other propositions from these. Although many of Euclid's results had been stated by earlier mathematicians, Euclid was the first to show ...

The Papyrus Oxyrhynchus 29 (P. Oxy. 29) is a fragment of the second book of the Elements of Euclid, unearthed by Grenfell and Hunt 1897 in Oxyrhynchus. More recent scholarship suggests a date of 75–125 AD. The classic translation of T. L. Heath, reads: "If a straight line be cut into equal and unequal segments, the rectangle contained by the unequal segments of the whole together with the ...

Drill Nomenclature-Points " Elements of Drill Points " Lip Relief Angle " Varies with the diameter of the drill and hardness of the material " On larger diameters and drills for harder materials, lip relief is decreased to as low as 8° " Drills for soft materials and small diameters have high relief angles up to 24° " Lip relief angles are measured across the margin

Reliable structures, very precise drawings. CYPECAD was brought about to carry out the analysis and design of reinforced concrete and steel structures, subject to horizontal and vertical forces, for houses, buildings and civil work projects.. Its use guarantees maximum analysis reliability and the best drawing design, including the following elements:

I bought this book seeking theory that would better my understanding of basic plane geometry, as a stepping stone to more advanced geometry. I had the usual high school level of understanding and view of plane geometry as boring, useless theory that left me with many loose ends.
